The principal activities of the Group are research and development, manufacture and sale of fine chemical products.

2. BASIS OF PREPARATION

The unaudited condensed consolidated interim financial statements for the six months ended 30 June 2020 (the "Unaudited Condensed Financial Information") have been prepared in accordance with Hong Kong Accounting Standard ("HKAS") 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") and the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on the Stock Exchange (the "Listing Rules").

The Unaudited Condensed Financial Information does not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements for the year ended 31 December 2019 (the "2019 Annual Financial Statements").

The Unaudited Condensed Financial Information has been prepared in accordance with the same accounting policies adopted in the 2019 Annual Financial Statements, except for the adoption of the new or revised Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual Hong Kong Financial Reporting Standards ("HKFRS"), Hong Kong Accounting Standards and Interpretations issued by the HKICPA, which are effective for the Group's financial year beginning on 1 January 2020.

The worldwide COVID-19 pandemic has evolved rapidly that adversely affected the economic activities for the six months ended 30 June 2020. The Group's revenue has inevitably been affected to a certain extent during the first half of the year but the related impact to the overall operating results has been offset by the decrease in the price of raw materials and the implementation of effective procurement strategies to contain the cost of raw materials as well as the adoption of effective cost control measures on production

overheads which altogether enhanced the gross profit. Given the extent and duration of the COVID-19 pandemic remain uncertain, the Group's estimates and assumptions may evolve as conditions change and the 2020 full year actual results could differ from those estimates. The Group will remain vigilant and closely monitor the development of the COVID-19 situation and will evaluate its impact on the Group's financial position and operating results accordingly.

3. PRINCIPAL ACCOUNTING POLICIES

In the current interim period, the Group has applied or early adopted, for the first time, the following new or revised standards, amendments and interpretations ("**new or revised HKFRSs**") issued by the HKICPA, which are relevant or effective for the Group's financial year beginning on 1 January 2020:

The application of new or revised HKFRSs that are relevant and effective from 1 January 2020 or not yet effective but early adopted by the Group did not have any significant impact on the Group's accounting policies and no material effect on the amounts reported and/or disclosures set out in these condensed consolidated financial statements.

The following new or revised HKFRSs, potentially relevant to the Group's condensed consolidated financial statements, have been issued, but are not yet effective and have not been early adopted by the Group:

¹ Effective for annual periods beginning on or after 1 January 2022

The Group is not yet in a position to state whether these amendments will result in substantial changes to the Group's accounting policies and financial statements.

4. REVENUE AND SEGMENT INFORMATION

The Group identifies operating segments and prepares segment information based on the regular internal financial information reported to the chief operating decision makers (i.e. executive Directors) (the "CODM") for their decisions about resources allocation to the Group's business components and for their review of the performance of the components.

² Effective for annual periods beginning on or after 1 January 2023

In the corresponding period last year, the Group identified the following reportable segments which were business components in the internal financial information reporting, they were within the scope of HKFRS 15 Revenue from Contracts with Customers. These reporting segments were determined following the Group's major product and service lines:

- (i) Cyanide and its derivative products: Research and development, manufacture and sale of cyanide and its derivative products;
- (ii) Alcohol products: Research and development, manufacture and sale of alcohol products;
- (iii) Chloroacetic acid and its derivative products: Research and development, manufacture and sale of chloroacetic acid and its derivative products; and
- (iv) Other chemical products: Sale of other chemical products, e.g. steam and other chemical products.

In the second half of 2019, the business components of the Group were reassessed, which within the scope of HKFRS 15 Revenue from Contracts with Customers, the research and development, manufacture and sale of fine chemical products of the Group are identified as a single operating segment. The single operating segment is reported in a manner consistent with the internal financial information reporting provided to the CODM.

The impact of the abovementioned change in the Group's reportable operating segments for the six months period ended 30 June 2019 is considered retrospectively and the Group's segment information is re-presented as if the Group had been operating as a single operating segment since the beginning of the reporting period.

Revenue for sale of fine chemical products is recognised at point in time as when there is evidence that the control of goods has been transferred to the customer, the customer has adequate control over the goods and the Group has no unfulfilled obligations that affect customer accepting the goods.

The Group's disaggregated revenue from customers are divided into the following geographical areas:

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The worldwide COVID-19 pandemic (the "Pandemic") has severely impacted world economy and political stability, bringing upheaval and uncertainty to internal and external business environments of the PRC. Although signs of economic recovery are emerging in the PRC, under a highly global supply chain environment nowadays, the economy of PRC is still facing stiff challenges. During the period under review, market competition further intensified as the Group encountered losing steam in its product as well as the downstream market. In addition, rapidly changing external geopolitical conditions adversely affected the export sales of the Group to a certain extent. The aforementioned factors accounted for the notable decrease in the weighted average selling price of the products of the Group as compared with the same period last year. To cope with the tough business environment, the Group expeditiously fine-tuned its business strategies, strengthened the sales and marketing for products with good potential and diligently explored new markets and expanded customers' base of its new products. Simultaneously, the Group moved towards regions with good prospects and opportunities for further development so as to diversify geography concentration risk gradually. All these measures successfully alleviated the negative impacts on the revenue of the Group due to decreased selling price and change of geopolitical conditions. As a result, the total revenue of the Group only slightly decreased when compared with that of in the corresponding period last year.

The persistence of the Pandemic is bringing a negative impact on the stability of the supply of raw materials. Therefore, the Group proactively and strategically coordinated with long-term suppliers in advance. It is not only ensuring the reliable and stable supply of raw materials but also enabling the Group to procure raw materials in the most cost-effective way. Coupled with the market prices of raw materials have also retreated generally, the cost of raw materials of the Group thereby decreased markedly as compared with that of in the corresponding period last year. Faced with an uncertain external business environment, the Group continued to strengthen the implementation of effective improvement measures on all controllable operating factors. Apart from the adoption of effective cost control measures on operating expenses, the Group also enhanced production efficiencies through continuous advancement of production process and optimisation of production capacity. Furthermore, the production activities of Weifang Parasia Chem Co., Ltd. ("Weifang Parasia"), a wholly-owned subsidiary of the Company, have been relocated to Weifang Binhai Petro-Chem Co., Ltd. ("Weifang Binhai"), another wholly-owned subsidiary of the Company (the "Relocation") during the period. The productions of Weifang Parasia have resumed normally after the Relocation. The Relocation promoted synergy effect on reduction of overall production costs of the Group during the period. The Board believes that the Relocation will continuously and effectively enhance the overall production efficiencies of the Group in the future. In light of all these aforesaid measures, both of the gross profit and gross profit margin of the Group improved as compared with those of in the corresponding period last year.

On the other hand, the Group implemented comprehensive cost control measures on all operating expenses. Besides, the PRC government imposed a series of policies to promote economic recovery and support the enterprises operating in the PRC. Furthermore, for the period under review, there was an absence of expenses such as write-off of property, plant and equipment which occurred in the corresponding period last year. In spite of the unabated Pandemic and deteriorating macro-environment conditions, the Group achieved continuous improvement in the financial results during the period under review due to the combination of the various foregoing effective measures.

With the development of two new products in 2017, the Group has also expanded the capacities and explored markets of products with good potential in last year, which have made remarkable contribution to the Group's revenue during the period. The Group believes that these products will become growing momentum of the Group's turnover and broaden the business scale of the Group in the future. Going forward, the Group will continuously strengthen research and development in accordance with its existing business competitive edges, cultivate more new products with lucrative potential and optimise product layout in order to promote business growth, expand revenue sources as well as diversify operational risks, thereby laying a solid foundation for the Group's sustainable development in the future.

As at the date of this announcement, restoration of the land of Weifang Parasia is still in progress as it has been delayed by the Pandemic. Upon the completion of land restoration work, the land will be reverted to relevant local authorities with a proper compensation (to be determined) payable to Weifang Parasia.

Outlook

The overall economy and business environment of the PRC are confronted by unprecedented challenges as the country has to deal with adversities such as the worldwide economic impact arising from the persistent Pandemic, escalating political tension between the PRC and the US, continuously shifting of international geopolitical clash and natural disasters affecting certain regions of the PRC recently. Faced with increasingly complex and uncertain external business environment, the Group will devote to improve the capability of risk-resilience of its overall business operations. Apart from implementing vigilant preventive measures on the Pandemic persistently, internally the Group will continue to enhance production efficiency through advancing production process and investing prudently to strengthen its core competitive competency as well as maintaining stringent control measures on operating expenses with reasonable levels. As regards external development, the Group will increase the flexibility of its business strategies continuously to respond rapidly to changes in macro environment. The Group will also focus, explore and foster new markets for products with good potential and gear up any new business opportunities arising from the economic recovery of the PRC. The Board will continue to monitor closely changes in external environmental factors and maintain its prudent and steady business approach with an aim to conserving the Group's strengths and resources while improving business operations. FINANCIAL REVIEW

Revenue and gross profit

During the period under review, the outbreak of Pandemic affected the global economy seriously. The Group faced slowed down of market demand and intensified market competition as a result. The average selling price of the Group was under pressure and dragged to a lower level which adversely affected the revenue of the Group to a certain extent. In addition, the business environment is influenced by US-China political tension which constrained the performance of overseas market of the Group. Against the backdrop of adverse external business conditions, the Group adopted effective sales and marketing strategies, concentrated on exploring new markets for good potential products to boost new revenue as well as diversified revenue geographically to reduce the market concentration risk. The Group recorded revenue of approximately RMB672.4 million for the six months ended 30 June 2020 (six months ended 30 June 2019: RMB688.1 million), representing a slight decrease of RMB15.7 million or 2.3% as compared with that of in the corresponding period last year.

Despite the global spreading of the Pandemic during the period under review, the gross profit of the Group increased to approximately RMB125.7 million (six months ended 30 June 2019: RMB108.4 million), representing an increase of approximately RMB17.3 million or 16.0% as compared with that of in the corresponding period last year. The gross profit margin for the six months ended 30 June 2020 also increased by 2.9 percentage points to 18.7% (six months ended 30 June 2019: 15.8%). The increase in gross profit and gross profit margin were mainly attributable to (i) expanding the sales of products with good market potential and better margin; (ii) adopting effective procurement strategies to source raw materials more cost effectively; (iii) a decrease in the overall price of raw materials; (iv) controlling the production overheads effectively; and (v) operating cost synergy resulting from the Relocation. All these factors helped to offset the negative impacts from the Pandemic and US-China political tension.

Operating expenses

Selling expenses decreased by approximately RMB4.8 million from approximately RMB29.7 million of the corresponding period last year to approximately RMB24.9 million. Such decrease was mainly due to (i) benefit from the implementation of policies by the PRC government to promote economic recovery, expressways and ordinary toll roads fee were waived thus saving transportation costs; and (ii) less relying on external sales agent causing the reduction of sales commission expenses. The selling expenses accounted for 3.7% of the Group's revenue (six months ended 30 June 2019: 4.3%).

Administrative and other operating expenses amounted to approximately RMB43.1 million (six months ended 30 June 2019: RMB73.3 million), representing a decrease of approximately RMB30.2 million or 41.2% as compared with that of in the corresponding period last year. Although the research and development expenses and removal and relocation expenses increased during the period under review, the overall administrative and other operating expenses was decreased which was principally attributable to (i) the absence of written-off of property, plant and equipment during the period under review and (ii) a decrease of provision for specific doubtful debts. The administrative and other operating expenses accounted for 6.4% of the Group's revenue (six months ended 30 June 2019: 10.6%).

holding company which increased by approximately RMB5.3 million to approximately RMB6.6 million (six months ended 30 June 2019: RMB1.3 million) as compared with those of in the corresponding period last year. The increase is mainly attributable to the increase in the amount of bank borrowings during the period under review.

About 78.4% of trade receivables were incurred in the second quarter of this year which are not yet due, 9.1% of trade receivables were incurred in the first quarter of this year and 12.5% of trade receivables are overdue over 180 days. Up to the date of this announcement, over 65.6% of trade receivables have been subsequently settled. After assessing the creditworthiness of these customers, the Directors considered that no further bad debt allowance is required on the trade receivables as at 30 June 2020.

As at 30 June 2020, bills receivable amounted to approximately RMB109.7 million and increased by approximately RMB3.2 million or 3.0% as compared with the balance of approximately RMB106.5 million recorded as at 31 December 2019. Since all bills receivable are bank acceptance bills, which are non-interest bearing and most of them have a maximum maturity period of six months, the payments of which were guaranteed by the reputable licensed banks in the PRC. proceeds from disposal of a subsidiary (six months ended 30 June 2019: RMB1.0 million). With the financial resources generated by the Group's operations, the Group had spent approximately RMB146.1 million (six months ended 30 June 2019: RMB80.5 million) in the acquisition of the property, plant and equipment; acquisition of right-of-use assets of approximately RMB1.1 million (six months ended 30 June 2019: Nil), bank borrowings repayment of RMB20.0 million (six months ended 30 June 2019: RMB20.0 million), interest paid of approximately RMB5.5 million (six months ended 30 June 2019: RMB0.5 million).

As at 30 June 2020, the Group had pledged bank deposits and bank and cash balances of approximately RMB104.1 million (31 December 2019: RMB171.4 million). The net current assets amounted to approximately RMB55.4 million (31 December 2019: RMB52.2 million).

By virtue of the Group's financial position with cash inflow generated from the operating activities and available credit facilities from the banks and the ultimate holding company, the Group is capable of meeting its foreseeable capital commitments and working capital requirements.
